[What is a title plant?](#)

Counties include: Bexar · Brazoria · Collin · Dallas · Denton · El Paso, Grayson
Fort Bend · Galveston · Harris · Hays · Johnson McLennan Montgomery · Parker · Rockwall
Tarrant · Travis · Waller · Williamson · Wise

You are now in business statewide in Texas!

As most Abstracters and Landmen know, you can spend several days in a courthouse searching for information which may be found in less than 30 minutes using a geographically indexed title plant.

During our 26 years in business we've accumulated many old title plants and records for several major Texas counties. Originally these records were index cards, tract books, large format drawings, microfiche and/or microfilm. Our scanning teams converted these books, cards, and microfilm into electronic images and we are now making them available to the public.

[CourthouseDirect.com](#) provides affordable, comprehensive access to **Historical Back Plants, Plats and Document Images** from one platform. In addition, we provide state-of-the-art Current Title Plants - "**Geo-Index**" for the title industry and are making these records available to the public too.

Although we lease access to title plants on a county by county basis our **TEXAS SPECIAL** may make sense for you. Almost ALL current and older title records for the Houston, Dallas, Fort Worth, El Paso, Austin, and San Antonio areas are now available at your fingertips from one source

- **TEXAS SPECIAL** statewide access means you no longer have to wait for someone in a local county to pull records
- **TEXAS SPECIAL** statewide access means more opportunity to compete throughout the state
- **TEXAS SPECIAL** statewide access means a tremendous increase in productivity throughout your organization

[CourthouseDirect.com](#) is committed to providing individual and group training so your staff can use these title plants and records most effectively.

Thank you and we look forward to working with you.

Paul Cones
President
